

Print pinwheel pattern out. Print coordinating dots paper on the reverse side and then cut the pinwheel square out. Cut along the dotted lines from the corners, not going all the way to the center. Bend (don't fold) one of the corners into the middle. Skip the next corner, and fold the following one in. Repeat until all 4 corners are inside. Push straight pin through the corners into the middle of the pinwheel. You can push the pin into a pencil eraser or straw.
